1. Draw the graph of $y = -2(x - 3)^2 - 4$ in the space below (you may do scratch work on the back of this sheet; make sure your answer is legible).

2. Give one example each of (1) an odd function, (2) an even function, and (3) a function which is neither odd nor even.

3. Bonus question: What is your teacher’s name for this course (first and last)?
